

KitchenEssentials™

Tracker™ Timer

DISPLAY TIMERS

The Tracker™ Timer is a sophisticated timing system that empowers kitchens with unparalleled precision and control. With its advanced features, including the ability to track multiple timing cycles per product and optional peer-to-peer communication. Its intuitive programming and user-friendly interface make it easy to customize timing parameters for any cooking or holding process, optimizing kitchen efficiency.

Unmatched Precision: Track up to three timing cycles per product key for precise control of complex cooking processes.

Enhanced Consistency: Ensure perfectly cooked food every time with accurate timing for any combination of, up to 24, products.

Streamlined Workflow: Optional peer-to-peer communication allows for synchronized timing across multiple Tracker units, enhancing efficiency and minimizing errors.

Improved Food Safety: Accurately monitor cook and hold times to minimize the risk of foodborne illness.

Increased Productivity: Free up staff by automating timing tasks and streamlining kitchen operations.

Models Available:

2-Display Timer

Model 23: 6-display timer

Model 24: 8-display timer

Model 26: 12-display timer

Model 28: 16-display timer

Model 42: 8-display timer

Model 44: 16-display timer

Model 81: 8-display timer

Model 222: 8-display timer
with daypart menu

Model 223: 12-display timer
with daypart menu

Model 224: 16-display timer
with daypart menu

Features & Benefits

Precise Timing

- Precisely times any combination of products – up to 24
- Count up or down (Models 222, 223, and 224 count down) in minutes and seconds or hours and minutes (up to 99 hours, 59 minutes per cycle)

Enhanced Visibility

- Easily monitor even when across the kitchen with audible and flashing displays
- Large, easy-to-read LED displays provide clear visibility of timing progress
- Three status LEDs per product key (2 status LEDs on Models 222, 223, and 224)
- Flexible tilt mounting for optimal viewing

Flexible Action Alarms

- Set individual hold alarms (not applicable to Models 222, 223, and 224)
- Program with one of six different alarm sounds
- Low, medium, and high volume levels

Peer-to-Peer Communication

- Trackers with optional communication ports (CP) can automatically transfer time from one Tracker to another with Master and Satellite pairing (not applicable to Models 222, 223, and 224)

Versatility & Performance

- Available in vertical (8 and 16 displays) and horizontal (2, 6, 8, and 12 displays) configurations
- Built to withstand the demands of a busy kitchen environment with a 2-year warranty
- 24/7 technical phone support

Versatility & User-Friendly Interface

- Five stages per product key, including time, name, cancel mode, alarm time, and sound. Models 222, 223, and 224 offer four.
- Displays show time or product names. Product names can be preloaded or self-programmed.
- Four daypart menus (available on 222, 223, and 224 models only) enable easy menu selection
- Intuitive programming with simple controls
