

(FASTIMER.)[®] Model MT-300

Appliance Timer

Food Quality Increases

Because accurate mixing times are extremely important to the blending of ingredients to produce the best quality food product, the accurate timing control of the appliance is essential. This operation can be costly if an operator must stand by the appliance to be sure the product is mixed for the correct amount of time. The (FASTIMER.)[®] MT-300 is the answer: perfect mixing—no increased labor cost!

Easy To Use

Operating instructions are printed directly on the front of the MT-300 timer making it simple for any operator to use.

Flip the switch on the (FASTIMER.)[®] MT-300, select a product key and your appliance will operate for a set amount of time. At the end of the cycle, your appliance will automatically shut down and the MT-300 will emit an audible alarm tone until the timer is turned off.

Up to six timing cycles can be programmed ranging from 1 second to 99 minutes and 59 seconds.

Across-the-Kitchen Monitoring

The large 7-segment easy-to-read bright red LED display makes checking the progress of any timing cycle from across the kitchen a cinch. Labor costs are reduced, while proper mixing times are insured.

Status LEDs (one per key)

Keeps you informed of the mixing status at all times.

Volume Control

A standard feature with three programmable volume levels: low, medium and high. Use the timer in the front or rear of the store without disturbing customers.

Use It Anywhere

Each MT-300 appliance timer comes with a mounting template to ensure the correct placement of the mounting screws. Simply install the screws to an appropriate surface according to the template, mount the timer and you're ready to go.

The MT-300 appliance timer plugs into a standard three-prong 120 VAC (center ground) outlet and is equipped with a built-in power receptacle so your mixer can be plugged directly into the timer. There's no need for an extra outlet!

Changeable Menu Strips

Make product label changes a snap with menu strips that slide in and out easily from the side of the overlay. All you need to do is remove the bezel and slide in a new menu strip.

After the Sale Support

As with all Kitchen Brains[™] products, the (FASTIMER.)[®] MT-300 Timer comes with 24-hour programming assistance via toll-free phone. Insures consistent food quality and enhances food safety by precisely timing multiple products during frying, holding, grilling and more.

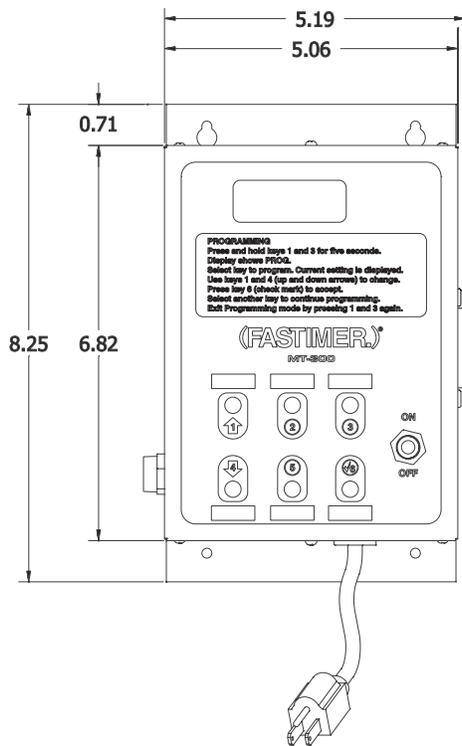

The (FASTIMER.)[®] MT-300 Appliance Timer can control time for a number of products in applications such as: Blenders, Mixers, Food Processors, Sifters, Marinators, Filters (polish timer), and More

Standard MT-300 Features

- Consistent food quality
- Easy to operate, program and clean
- Simple to mount
- Mixing accuracy: saves time and money
- Decreased labor cost: no need to stand over the appliance; other important kitchen tasks can be performed
- Automatic appliance shut down
- Across-the-kitchen monitoring—large bright red, easy-to-read display
- Changeable Menu Strips
- 1 status LED per product key
- Uses 120 volt power
- Choice of 3 volume levels
- 6 timing cycles
- Precision and durability with electronics

SPECIFICATIONS

MECHANICAL

- 16-gauge Series 300 stainless chassis
- Smooth, easy-to-clean polyester face with back-printed text
- Maximum ambient temperature: 158°F / 70°C, 95% max. non-condensing humidity

ELECTRICAL

- One 4-digit, 7-segment LED display: .625" H
- Solid-state integrated circuit design
- Input voltage: 120VAC, 50/60 Hz, 1200VA Maximum
- Output: controlled load up to 1200 watts of 1/3 HP. Fuse protected, 15 amp slow-blow at the end of the line.
- Power Cord: 6 ft. grounded, 3 wire, oil resistant neoprene
- Switch life rating: 1 million cycles
- Status indicators rated life: 50,000 hours
- Noise spike protection: 4,000 volt minimum (on timers and all properly installed controls)

SHIPPING WEIGHT

- Approx. 5 lbs. (2.26 Kg)
