

FINALLY, A KITCHEN THAT CAN THINK FOR ITSELF.

PROVIDING FOOD THAT'S 100% HOT, FRESH & AVAILABLE.

Kitchen Brains® Quality Production Manager (QPM) leverages and monetizes all of the restaurants' human and physical assets to increase profits and revenues, enhances customer loyalty and provide a powerful competitive advantage. Kitchen Brains® takes your restaurants into the 21st century. The time is right to put a genius on the menu.

WHAT IT DOES

- Kitchen Brains® breakthrough Quality Production Manager (QPM) application is a systemic solution that wirelessly networks cooking appliances.
- The solution automates food production and provides real time remote monitoring and administration capabilities.
- All of this is done while delivering meaningful quantifiable results in the areas of food quality, food availability, cost control and asset management

KITCHEN BRAINS®
(FAST) MODULARM SCK

THE RESULTS

"Based on our excellent results with SCK's [Kitchen Brains] restaurant management system, we decided that it makes business sense to roll the system throughout the network. Our pay-back for this new investment is expected to be a little over 12 months. The ROI is driven by results achieved in the test stores where significant improvements in labor productivity, food availability and quality resulted in increased sales and lower costs."

– **Jody Luihn**, president of Luihn Food Systems

"Kitchen Brains allows me to remotely manage my store, and monitor product availability and freshness when I'm not there."

– **Max Piver**, KFC Store Manager

"One of the more interesting things we've seen this year at the NAFEM show."

– **Valerie Killifer**, Editor, QSRWeb.com
